SPECIAL SHADES TO ORDER.

In presenting this catalogue, we desire to impress upon Architects, Contractors, or anyone interested in building, the growing favor with which the style of staining or coloring mortar is received. The character of the endorsements presented herewith speaks for the merits of our product.

S. BOWEN'S SONS,
PHILADELPHIA.

ITS
USES.

FOR LAYING BRICK.

DIRECTIONS.

1. The mortar must be cold before mixing in our stains.
2. Keep soft in package by covering with water and pour off before using.
3. Do not allow stain to freeze.
4. To secure a uniform and smooth shade "hoe in" stain thoroughly.
5. For very fine press-brick work strain the stained mortar through a coarse sieve.

FOR INSIDE ROUGH SAND FINISH.

See pages 6 and 7 for special information on Sand Finish.

DIRECTIONS.

1. Use ½ to 1½ lbs. to a square yard, according to shade desired.
2. If practicable, mix the stain with sufficient mortar to plaster the entire job at once and pile it. From this stock moisten and work quantities as required.
3. Let the colored coat dry as slowly and evenly as possible by covering the windows.
4. Avoid patching, and make "HANDS OFF" the rule till the work is dry.

Sand Finish thus Stained

Makes a good background for stencil and ornamental plaster work. The colors obtained are permanent, and all the **washed** appearance produced by tinting with kalsomine is avoided. The stain being clear through the outer coat, any **dents** or **scratches** will not show as in kalsomine work.

FOR CEMENT WORK.

DIRECTIONS.

1. Mix the stain with gravel and sand and set aside in barrels, then add cement as required for use.
2. Proportions by measure: 1 of stain and from 20 to 25 of sand, gravel and cement.
3. To obtain the desired shade, mix a small quantity of sand, gravel and cement together and let thoroughly dry.
4. The darker you have the gravel the less stain will be required.
5. Keep the stain soft by covering with water.

S. BOWEN'S SONS,
PHILADELPHIA.

PENNSYLVANIA

PHILADELPHIA, March 8, 1893.

Office WM. S. KIMBALL, Operator in Real Estate,
Forty-first and Chestnut Streets, Philadelphia.

I have laid over 500,000 press bricks and 1,000,000 stretcher bricks in black mortar, using your "Pecora Black Mortar Stain" as follows: 22 pounds per 1000 press bricks; 28 pounds per 1000 stretchers. After standing from six to ten years your black has not faded or run. It is the best in the market without any exception. It will work quicker and smoother and more work can be done (that is to say, more bricks can be laid). You are at liberty to refer to me at any time.

WM. S. KIMBALL.

NORTH CAROLINA

WILMINGTON, Feb. 11, 1893.

Gentlemen:—We used your "Pecora Mortar Stains" in the New Hanover Court House, Electric Power House, Atlantic National Bank, Bear Building, etc. It is the best on the market.

Yours very respectfully, BROWN & GARBER.

NEW YORK

NEW YORK, Feb. 11, 1893.

Gentlemen:—Have used the "Pecora Mortar Stain" in the Commencement Hall, Princeton College, N. J.; Dormitory, Princeton Theological Seminary; Bloomingdale Asylum, White Plains, N. Y.; Collegiate Reformed Dutch Church, N. Y. They have given entire satisfaction. NORCROSS BROS.

MINNESOTA

MINNEAPOLIS, Feb. 27, 1893.

Gentlemen:—We consider the "Pecora Mortar Stain" the best in the market. We always use it if not forced to use other by the architects.

Yours truly, JOHN CHICK & SONS.

CALIFORNIA

SAN FRANCISCO, March 31, 1890.

Gentlemen:—We have used your "Pecora Mortar Stains" of several colors in the Academy of Sciences Building in this city. They were satisfactory in every respect. yours truly, PERCY & HAMILTON, Architects.

DETROIT, March 3, 1890.

The Pecora Mortar Stains used in the Seely Manufacturing Co's building have given perfect satisfaction, and I take pleasure in recommending them to anyone desiring a good article. Yours truly,

JOHN FINN, Builder.

NEW HAMPSHIRE

MANCHESTER, Feb. 20, 1893.

We have used your Stains for the past three years, and consider them the best in the market. They have been in all respects entirely satisfactory.

Yours truly, HEAD & DOWST CO.

MASSACHUSETTS

BOSTON, Feb. 4, 1893.

We used, with satisfaction, your Mortar Stains in the England Block, Pittsfield, Mass.; Vassar Dormitory, Poughkeepsie, N. Y.; Crane & Co's Government Mill, Dalton, Mass., and Henshaw Street School, Boston.

Yours truly, HASCAL DODGE & CO.

TENNESSEE

CHATTANOOGA, Feb. 13, 1890.

Gentlemen :—Have used your Mortar Stains in tbe Richardson Block and other buildings, and are much pleased with the results.

Yours truly, SULLY, TOLEDANO & PATTON, Architects.

KENTUCKY

MAYSVILLE, Feb. 6, 1893.

Gentlemen :—Your Stains have given entire satisfaction. They make a perfect cement joint, therefore a strong bond which is worth its extra cost, to say nothing of its good coloring qualities. Yours respectfully, S. B. CHUNN & CO.

S. BOWEN'S SONS,
PHILADELPHIA.

FOR

INTERIOR FINISH ONLY.

These stains are something entirely new, the result of three or four years of careful study and practical tests, and we know of nothing in the color line that will stand as well in lime. This statement applies particularly to the GREEN, LILAC and CANARY. They have been used and endorsed by some of the leading architects and builders, and we are satisfied they will benefit and please the building fraternity.

THEY

- WILL NOT FADE.
- ARE MORE DURABLE AND CHEAPER THAN PAINT OR PAPER.
- CONTAIN NO POISONOUS SALTS COMMON TO CHROME YELLOWS, GREENS, BLUES, ETC.
- MAKE A HANDSOME BACKGROUND FOR STENCIL OR ORNAMENTAL WORK.
- WILL NOT LOOK WASHED OR FADED, LIKE TINTS MADE WITH KALSOMINE OR OTHER CLAYS.

PECORA SAND

NINE REGULAR COLORS—PRICE LIST:

	Per Lb.		Per Lb.		Per Lb.
CANARY .	12c.	LILAC .	10c.	CREAM .	5c.
GREEN .	10c.	RED . .	6c.	SALMON .	4c.
BLUE . .	10c.	TUSCAN .	5c.	SEAL . .	4c.

By Weight { It requires from 1 to 5 lbs. Stain to tint 100 lbs. of white sand finish—this varies according to the depth of shade wanted and color selected.

By Measure {
To make a delicate tint
For CANARY, GREEN, BLUE and LILAC.
Use 1 bucket Stain to 30 buckets of white sand finish.
For RED, TUSCAN, CREAM, SALMON or SEAL.
Use 1 bucket Stain to 50 buckets of white sand finish.

PACKAGES. Packed only in 1, 2, 3, 5 and 10-gallon packages, holding from 10 to 150 pounds.

AMPLES showing color effects in sand finish in definite proportions, will be sent free to any Architect, Mason, Plasterer, Builder or Owner.

S. BOWEN'S SONS,

DIRECTIONS.

To insure a thorough mixing-in of color and an even job, free from streaks, observe the following:

1. *Use ¼ lb. to 1 lb. to a square yard, according to shade desired.*
2. *Thin down the stain with water to a thick cream.*
3. *Add this to the sand and mix through it thoroughly, adding more water if necessary.*
4. *To the colored sand add the usual quantity of slacked lime. Care being taken to have the lime paste cool before adding sand and color.*
5. *If practicable, mix the stain with sufficient mortar to plaster the entire job at once and pile it. From this stock moisten and work quantities as required.*
6. *Let the colored coat dry as slowly and evenly as possible by covering the windows.*
7. *Avoid patching, and make "HANDS OFF" the rule till the work is dry.*

The sand finish being stained throughout its entire mass, dents and scratches will not show, as in the case of paper, paint and kalsomine.

FINISH STAINS

ESTIMATING.

ARCHITECTS and CONTRACTORS in estimating cost of GREEN, CANARY, LILAC and BLUE, add 2c. to 4c. per square yard (according to depth of shade) above cost of plain sand finish; 1c. to 2c. per yard for the other shades.

QUANTITY REQUIRED.

PLASTERERS in figuring quantity required must be guided by the depth of shade wanted, using ¼ to ¾ of a pound per square yard, according to depth of tint. We have a large sample card of several tints made up in sand finish with these stains, and if shades are satisfactory, you can produce the same tints and know quantity required by dividing the square yards of wall to be covered by 8, and multiplying result by 1, 2, or 5, according to shade selected on card.

EXAMPLE: Room 16 ft. square, 9 ft. high, to be done in blue, like sample card, contains 64 square yards.

8/64
8 × 2=16 lbs. of blue to do the room.

MORTAR STAINED WITH PECORA RED.

PHILADELPHIA, January 15, 1889.

Answering your inquiry as to my opinion of "Pecora Mortar Stains," I used them in the Edison Electric Light Co's building, Philadelphia, with excellent results, both inside and out; they produce handsome shades.

February 18, 1893.

You are awarded the contract to furnish all the Mortar Stain for the new Pennsylvania Railroad Depot, Philadelphia. GEO. W. ROYDHOUSE, Contractor,
24 South Seventh Street.

S. BOWEN'S SONS,
PHILADELPHIA.

MARYLAND

BALTIMORE, Feb. 14, 1893.

Gentlemen :—It affords me pleasure to certify that the color I used in staining my mortar, known as the "Pecora Mortar Stain," has given me better satisfaction than any I have used. I would recommend it to the trade.

Yours respectfully, WALTER S. BROWN.

MINNESOTA

MINNEAPOLIS, Feb. 21, 1893.

We know of no better Mortar Stains than those furnished by you.

Respectfully, THORPE BROS.

DELAWARE

WILMINGTON, Feb. 22, 1893.

It gives me much pleasure to recommend your "Pecora Mortar Stains." Have used them largely and to my entire satisfaction. WM. B. AUSTIN.

PENNSYLVANIA

PHILADELPHIA, Feb. 16, 1893.

Used your "Pecora Mortar Stain" in train shed of the Philadelphia and Reading Terminal; in the Imperial Hotel, Philadelphia, and the buildings for Frankford Insane Asylum, and find them superior to any stains I have used.

Very respectfully yours, JOHN ATKINSON.

RHODE ISLAND

PAWTUCKET, Feb. 7, 1893.

I prefer your "Pecora Mortar Stain" as it mixes more readily with mortar than dry color. I used your stains in the Rhode Island Institute for the Deaf. They were satisfactory. Very truly yours, ROBERT WILSON.

GEORGIA

ATLANTA, Feb. 24, 1893.

Gentlemen :—We have used your "Pecora Mortar Stain," both red and buff, and will say that it has given us entire satisfaction.

Yours truly, MILES & BRADT.

S. BOWEN'S SONS,
PHILADELPHIA.

TO

ARCHITECTS

HOW TO SPECIFY

Pecora Mortar Stains

CAUTION.

WE specially request any architect who may specify the **Pecora** brand, to name the desired shade, and specify in full

PECORA MORTAR STAINS,

Made by S. Bowen's Sons, Philadelphia.

We make this request in order to prevent the use of worthless imitations. When you wish to use our stains, write us and **we will secure a dealer** who will supply the operation.

IMPORTANT.

LIME and mortar vary in strength and take more or less stain, according to the **richness** of the lime and **quantity** of sand used. **Before laying** your brick, take from the mortar-bed a small portion of **Stained Mortar** and dry it out **thoroughly.** This will **prevent** any possible **mistake** in getting in **too little stain,** and having a **pale or faded-**looking job.

LIVINGSTON & WRIGHT,
OAKLEY & HOLMES.

NEBRASKA

OMAHA, February 26, 1893.

I have used the "Pecora Mortar Stain" in several buildings, and am highly pleased with it. I take pleasure in recommending it.

G. H. YOUNGERMAN.

S. BOWEN'S SONS,
PHILADELPHIA.

SOLD IN

Paste Form Only

Are a fast dye and form a **Chemical Union** with the **Mortar.** Rain, snow, heat or cold will not cause them to run, bleach or stain the brick. They are a fast dye, and make clean, clear shades, **free from streaks.** Being a smooth, soft paste, will mix readily with the mortar.

Great Staining Power.

It takes **less** of the **Pecora** brand than of other makes **to do the same work.** They are a fast dye and form **a chemical union** with mortar. They are economical, as they are from 75 to 150 per cent. stronger in staining power than others.

Strictly Harmless.

Contains nothing injurious to workman or mortar and will not increase the white deposit common to brick fronts. **Free from oil.** Stained mortar is cheaper and more durable than painted joints. Mortar will cause the paint to rot, fade and chip off. Our mortar stains will not make the mortar crumble, shorten or set more rapidly than white mortar.

S. BOWEN'S SONS,
PHILADELPHIA.

OHIO

TOLEDO, Feb. 21, 1893.

For durability, strength and economy your Mortar Stains are the best; we prefer "Pecora" to all others.
